

Description: Very pretty woodland with variety of colour coded routes.  
Take care: Woodland footpaths can be quite uneven with tree roots, especially at the lower end of the wood; slightly steep in places; can get very muddy; no stiles but one fallen tree across path that has to be climbed over; some rough hewn steps if you take the green route and some footbridges with step up; take extra care near stream banks.  
Difficulty level: Easy when dry, moderate if muddy.
